

To whom it may concern:

The one piece of legislation that the Indiana House and Senate has passed that has helped the citizens of the state is the law where people can ask not to have telemarketers call their home. Please, if you pass something, pass it AS strict as Indiana's code or stricter. Don't water it down. People have so many options to buy things; we don't need someone calling to invite us to buy something.

Thanks
